i-Plan

Enterprise-wide project management in a single environment

Introduction

It is a fact that project managers and team members must always complete their projects on time and within the prescribed budget. Furthermore, managing projects to meet these demands is a time-consuming task. It is here that i-Plan is of benefit.

What is i-Plan?

i-Plan is a comprehensive project management software solution. It is a tool for project managers and team members. **i-Plan** allows project planning at organizational and individual levels. It also provides project scheduling, documentation, process control, team management and report access functions.

Benefiting from Lotus Notes

Being based upon Lotus Notes, **i-Plan** uses collaborative procedures. This allows you to:

- ▶ Schedule meetings and synchronize these with Notes mail and calendar.
- ▶ Assign tasks.
- ▶ Validate tasks through workflows.

This ensures that team members are always informed as to the progress of their project. It also allows team members to report on project progress, view tasks, be aware of completion dates as well as share knowledge from any location.

Benefiting from Microsoft Project

i-Plan provides on-line integration with Microsoft Project. This allows enterprise-wide project management in a single environment.

This integration is a pure on-line feature, and there are no attached Microsoft Project files that require synchronization. The Microsoft Project files update the Lotus Notes data in real-time.

Optimal use of Lotus Notes and Microsoft Project

Using both applications means that Project planning can occur in either Lotus Notes or Microsoft Project.

Tasks can be updated and deadlines can be set in either Lotus Notes or Microsoft Project.

Furthermore, project templates and task structures can be created, managed and reused in new projects.

Benefiting from Office applications

i-Plan integrates with office applications such as word processors, spreadsheet applications and presentation managers.

Templates can be created for each of the office applications and used when creating documents. These documents can be stored in your project.

Benefits in brief

- ▶ **Maximizing benefits from Lotus Notes, Microsoft Project and office applications.**
- ▶ **Complete control over project plans, documents, tasks and deadlines from a single location.**
- ▶ **Project participants always informed of responsibilities and status via workflows.**

All correspondence, reports and emails can be stored in a centralized project store and project library.

More than just timelines and deadlines

i-Plan provides full project life-cycle management within a single environment. It includes various management views with indicators for monitoring and adjusting project progress. Being based upon the xArc architecture allows for integration with other xArc applications as well as enhancement and upgradeability.

A complete package

i-Plan is delivered with a comprehensive *Guide to using i-Plan*, which explains the procedures, workflows and functions that are available in the **i-Plan** database.

About i-Seven ...

i-Seven is a privately owned Scandinavian software development company. It has its headquarters in Copenhagen and a subsidiary in Malmoe. It was established in January 2002 and has a staff of 20. It has a turnover of 20-25 million Danish kroner of which approximately 15% is from exports.

The people behind i-Seven have accumulated many years of experience in software product development and the provision of consultancy services for IBM platforms. The consultants can participate at all levels in Lotus Notes/Domino and/or IBM WebSphere/Workplace development projects.

Best in IBM Software solutions

i-Seven's most important business partner is IBM. i-Seven is a certified IBM Advanced Business Partner, TCI partner and can negotiate in accordance with IBM's SKI agreement.

i-Seven's strategy is to assist customers in using the potential of their existing Lotus Notes/Domino investments; while together with i-Seven's own solutions define a future path within the IBM software strategy of IBM WebSphere/Workplace. The goal is to be the preferred partner for IBM software solutions.

Today i-Seven is a leading IBM partner in IBM Workplace and is a significant player in the Danish Lotus Notes/Domino and WebSphere markets. i-Seven established itself in Sweden in September 2005 and has big expectations as regards the future development of the Swedish market.

Innovative Solutions

"i-Seven assists businesses in optimizing their processes via standardized use of IT system functionality."

i-Seven fulfills its mission by offering a range of products and services that can be delivered as projects, part solutions, small solutions or on an hourly basis. These products include:

- ▶ **i-Office**
MS Office integration
- ▶ **i-Portal**
Notes portal
- ▶ **i-Print**
Printing from Notes
- ▶ **i-Question**
Survey questionnaire
- ▶ **i-Sales**
Sales support/CRM
- ▶ **i-Site**
Content Management System
- ▶ **i-Support**
Helpdesk

Development platform xArc

All i-Seven products are built upon the i-Seven **xArc** application development platform. This is an object-oriented development tool for those who develop Lotus Notes/Domino applications. **xArc** is i-Seven's offering of a platform that can assist customers when migrating from Lotus Notes/Domino to IBM WebSphere/Workplace.

i-Seven's market focus is in the Scandinavian countries. i-Seven has offices in Copenhagen and Malmoe and has close cooperation with business partners in Denmark, Sweden and Norway.
